CANDIDATE FOR PRESIDENT

CAROL L. EGNER, MD • Medical College of Ohio, 1981
Obstetrics/Gynecology • Years in Practice – 30

Past/Present Activities

Academy of Medicine of Cincinnati – Treasurer, Councilor; **Ohio State Medical Board**– Past President (2000), Past Board Member, Quality Intervention Program; **Cincinnati OB/GYN Society** – Past Secretary; **Bayley Place** – Mission Committee; **Caring Response Madagascar Foundation** – Medical Mission Trips; **Seton High School** – Board Member; **Goals for Academy** – The Academy of Medicine of Cincinnati has been the stable and long-standing organization representing local physician interests. The Academy has had success influencing insurance company reimbursements to local physicians when it was alleged that insurers

conspired to keep insurance reimbursements to local physicians at a lower rate, as well as passing tort reform legislation that helped stabilize the malpractice environment in Ohio. It is also an avenue for pleasure and learning. But the past years have seen a decline in membership. The Academy is on a strategy of re-birth to appeal to the needs and desires of today's physicians. I want to contribute to this effort. Both independent and hospital-employed physicians need a voice in these changing medical times. The Academy can be the collective voice needed to look out for the interests of all physicians. Who else is doing that?

CANDIDATES FOR COUNCILOR

BARRY A. BROOK, MD
University of Cincinnati College
of Medicine, 1983
Internal Medicine
Years in Practice – 31

Past/Present Activities

Academy of Medicine of Cincinnati – Planning Committee for University of Cincinnati/Academy of Medicine Board Review Course 2017; **Mercy Health Physicians** – Primary Care Committee; **Jewish Hospital** – Chairman, Department of Internal Medicine; Program Director, Internal Medicine Residency Department; **Goals for Academy** – I would like to develop a closer relationship between the community hospitals and the University of Cincinnati College of Medicine dealing with common medical issues. These include medical education, the drug and opioid crisis, and delivery of health care. We need to work together rather than compete for the community.
