

REBECCA W. SHORT, MD

Dermatologist
Group Health, TriHealth Physician Partners

CANDIDATE STATEMENT

I, like many of you, was driven to become a doctor because I wanted to help people. As more pressures have been placed on physicians and more constraints on our time, more of the human factor of medicine and feeling of making a difference in the lives of our patients and the communities we serve is missing now. As Community Outreach Chairperson for the Academy this year, I have a renewed satisfaction from helping more than just my patients in their lives and want as your next president to help others find the joy in medicine again by having more outreach programs when doctors are available to serve the community with their time, talents or treasures. I will have something available on a monthly basis for members and encourage non-council members to have a seat at the table, participating in meetings if they would like and bringing forth ideas for community programs in which we can participate. Then, you will know where and hire your money is being spent. As your next president, I look forward to working with you for years to come!
